

Call for going for a walk  
On the equinox of spring

Dear Friends,

We Visionists (Free street artists in the change of ages) want you to remember the spring equinox in the age turning year!

We invite you to decorate the pedestrian zone by wearing colourful and cheerful clothes!

Our merry joyful and happy liberating aquarius age surely can and will be drummed and danced rhythmically and played as music!

We want so to create the new feeling of “WE” as people, who are convinced of the arrival of the new age!

Also

We want to create the feeling of “We” as people, who desire our new spirit of the times!

Also

We want to create the feeling of “we” as people, who don’t want to be lonely any more!

Also

We can experience the feeling of “we”  
– while “Declaring our belief” –  
– while “dancing happily”  
– while “drumming cheerfully”  
– while celebrating “our community”

We like to get over our self shyness and distrusting timidity to be remarkable and to be watched by people and – want to leave behind our very shy un-free self stiffness being watched by the public!

Since childhood we are educated to be shy and extremely anxious and subservient, we don’t like to be watched and noticed – this puts us in anonymous isolation. From generation to generation lies could rule us as well as stupidity, greed, envy, inequity, arrogance, disposal, untruth, rivalry, bullying in every form because of our shy subservience!

As soon as we start to overcome the extremely shy subservience, and

to become colourful and very noticeable street artists, we discover ourselves as courageous people of the new age.

We visionists (action artists of the age turning) want to call you, to celebrate the equinox of spring without the shy subservience until now – so colourfully noticeable – very free dancing and free feeling!

We like you to use the pedestrian zone in your city for this aim from 16 o'clock on the 20<sup>th</sup> of March 2012 in the way of shopping and going for a Walk!

When we discover “We” as the new age, we want to destroy our lonely anonymous “I” as the age until now!

When we discover this new feeling of “We” while overcoming the shy subservience without any aggression against anything, we want to approach a common free future as “We” together with all of you!

When we discover our “We” with me, we are FRIENDS, who plan our future consensually orientated and we will form it together!

When I discover my “We” with me, I won't feel lonely anymore!

So I am your friend and I want to live with all of my friends in our republic of Friends!

As you surely know friends meet one another without distrust, without greed without rivalry, without ulterior motive, without hierarchy!

You are our “The WE” of the future – you are “Our YOU” of the future – I am “My You” of the future – We are “Your I” of the future!

We only have to overcome our own fear!
